

MASS FINISHING FLUIDS

ALL-PURPOSE VIBRATORY & BURNISHING OPERATIONS

INTERNATIONAL CHEMICAL COMPANY (ICC)

blends advanced-technology surfactants, strong detergents, potent antifoaming agents, and effective lubricity additives into acidic and alkaline fluids which are formulated for a variety of mass finishing operations like cleaning, deburring, brightening, burnishing, degreasing, and descaling. Engineered to minimize cycle times and operating temperatures, these fluids help to lower your operational costs while improving surface finishes, reducing foam generation, and providing detergency and corrosion protection for your manufactured parts, media and machinery.

CLEAN • DEBURR • BRIGHTEN • BURNISH

ICC FLUID	pH	FERROUS	ALUMINUM	CU ALLOYS*	ZINC
L-38-MM	5.5 @ 1%	✓	✓	✓	
L-85	4.5 @ 2%			✓	
L-65	9.0 @ 3%		✓		✓

CLEAN • DEBURR • DEGREASE • DESCALE

FEATURES & BENEFITS

- Specially-Blended Surfactant Packages
- Select Yellow-Metal Passivator Additives
- Effectively Clean Glazed & Corroded Media
- Remove Metalworking Fluids, Dirt & Oily Soils
- Remove Carbon Scale, Scoring & Tarnish
- Excellent Rust & Corrosion Protection
- A Product for Every Mass Finishing Operation
